Upper Palmer Creek Prescribed Fire

Scheduled: Late April/Early May 2010
Size: 400 Acres
Fuel Type: Sagebrush, Aspen, Mixed Conifer
Contact: Chris Vero 307-739-5418

Project Details:

The Jackson Ranger District of the Bridger-Teton National Forest would like to announce the possible implementation of the Upper Palmer Creek Prescribed Burn in the next week or two. Weather and fuels conditions will drive our decision to implement the burn this spring.

Objectives of the burn are to rejuvenate aspen and sagebrush fuels as part of the effort to increase defensible space to the community of Hoback Junction, WY. This is the first step in implementing the larger Hoback Junction Fuels Reduction Project. Reference the adjacent map for the burn location. Expect temporary, short term closures of the Palmer Creek Trail during burn implementation.
